

Task 1 Checklist - Install and use an anti-virus program (the DURCH tests)

Configuration Issue	Check if True
Is an anti-virus program installed on your home computer?	
Do you check files for viruses on demand, such as when you are sending an attachment via email?	
Do you check for new virus signatures daily?	
Is it configured to check every file that gets to your computer (i.e., floppy disks, CD-ROMs, email, and the web)?	
Do you have heuristic tests enabled, if possible?
